

U.S. Population by Age

Age Groups in America

The graph shows the different age groups that make up the population of the United States.

1. How many age groups are shown on the graph?
2. What does the blue section of the graph represent?
3. What is the largest age group in the United States?
4. What is the smallest age group in America?
5. How much of the population is between 18 and 64—half, less than half, or more than half?
