

Cirrus Clouds

Very high, thin, wispy clouds that are made of tiny ice crystals, they often mean that there will be a change in weather

Cumulus Clouds

White, fluffy clouds that look like cotton balls, often seen on sunny days

Stratus Clouds

Lower flat clouds that stretch across the sky, blocking the sun, sometimes bringing drizzle (a light rain)

Nimbus Clouds

Dark storm clouds that bring rain or hail and thunder and lightning

Hurricane

a severe tropical storm that forms over warm oceans that brings hail, heavy rain, and winds over 75 mph

Tornado

A violent, dangerous column of air that forms by wind in a thunderstorm and causes damage to anything it touches
