

# Filmstrip

**1** Pretend that Hollywood wants you to write a movie about a mischievous mouse. On the filmstrip, draw scenes in order and write about the mouse's adventures.

**2** Decorate the viewer with a picture of the mouse and the title of the movie.

**3** Cut the filmstrip and the viewer. Cut along the dashed lines to make two slits in the viewer.

**4** Weave the strip through the viewer. Pull the strip to see your "movie"!

Make a longer movie by completing another filmstrip and taping it to the bottom of your first one.
